# Axscend | Compliance Connect Feature spotlight

Ensuring your fleet is compliant to all DVSA requirements is key to keeping your vehicles on the road and not being fined. Missing a vehicle service or repair could not only put your drivers and other road users at risk, but also result in some of your fleet being grounded.

Features of Compliance Connect

- Highlights upcoming services, inspections and MOT's
- Notifies you of maintenance schedules and bookings
- Highlights any that have been missed or are critical
- View by fleet and individual asset

It also shadows the DVSA's **'Earned Recognition' scheme** giving you control and complete visibility of your compliance status.

Compliance Connect works alongside the **Driver Connect** app which replaces the need for pen & paper driver walkaround checks. It allows you to customise the checklist to suit your operation and its assets, creating more engagement from drivers.
